

## HOW? Will my information be shared?

**The Hampshire Health Record is a combined electronic health and social care record about people living in Hampshire, Portsmouth and Southampton.**

The record is held securely and includes information from GP surgeries, hospitals, social care and community health teams.

This helps the health and social care professionals working with you to both coordinate and improve your care.

## **You do have a choice**

You can control what information is shared about you by:

- Requesting a copy of the information held about you on the Hampshire Health Record - you can then decide if you want to withhold your records
- asking who has looked at your Hampshire Health Record
- asking the HHR team or your GP not to share your records

## **Contact information**
